An Inspired Design...for Every Home

A Strong Statement

The array of design, color and screen choices available in our premium security doors allow you to create the perfect door for your application, delivering the function you want while making a strongly secure design statement. Commercial grade, metal alloy frames combined with a variety of screen choices and countless hardware options to secure your home's entryways and add the function you value most.

TITAN

Exclusive Technology

The Meshtec Advanced Screen System utilizes an exclusive manufacturing platform to deliver patent protected, high tensile strength, stainless steel screen security products that are easy to see through and almost impossible to get through. This screen option is available with some designs.

While under tension, wires are woven into stainless steel mesh

Stainless steel mesh is cut, pre-treated, and powder coated

Mesh panels are secured in product frames with patented mechanical attachment systems

*Meshtec screen is the only screen available in the Full View, Haven and Terra door.

Single door images shown are 36" x 80" doors and show the direction of the design when it is manufactured. Designs will change slightly with door width and height variations.

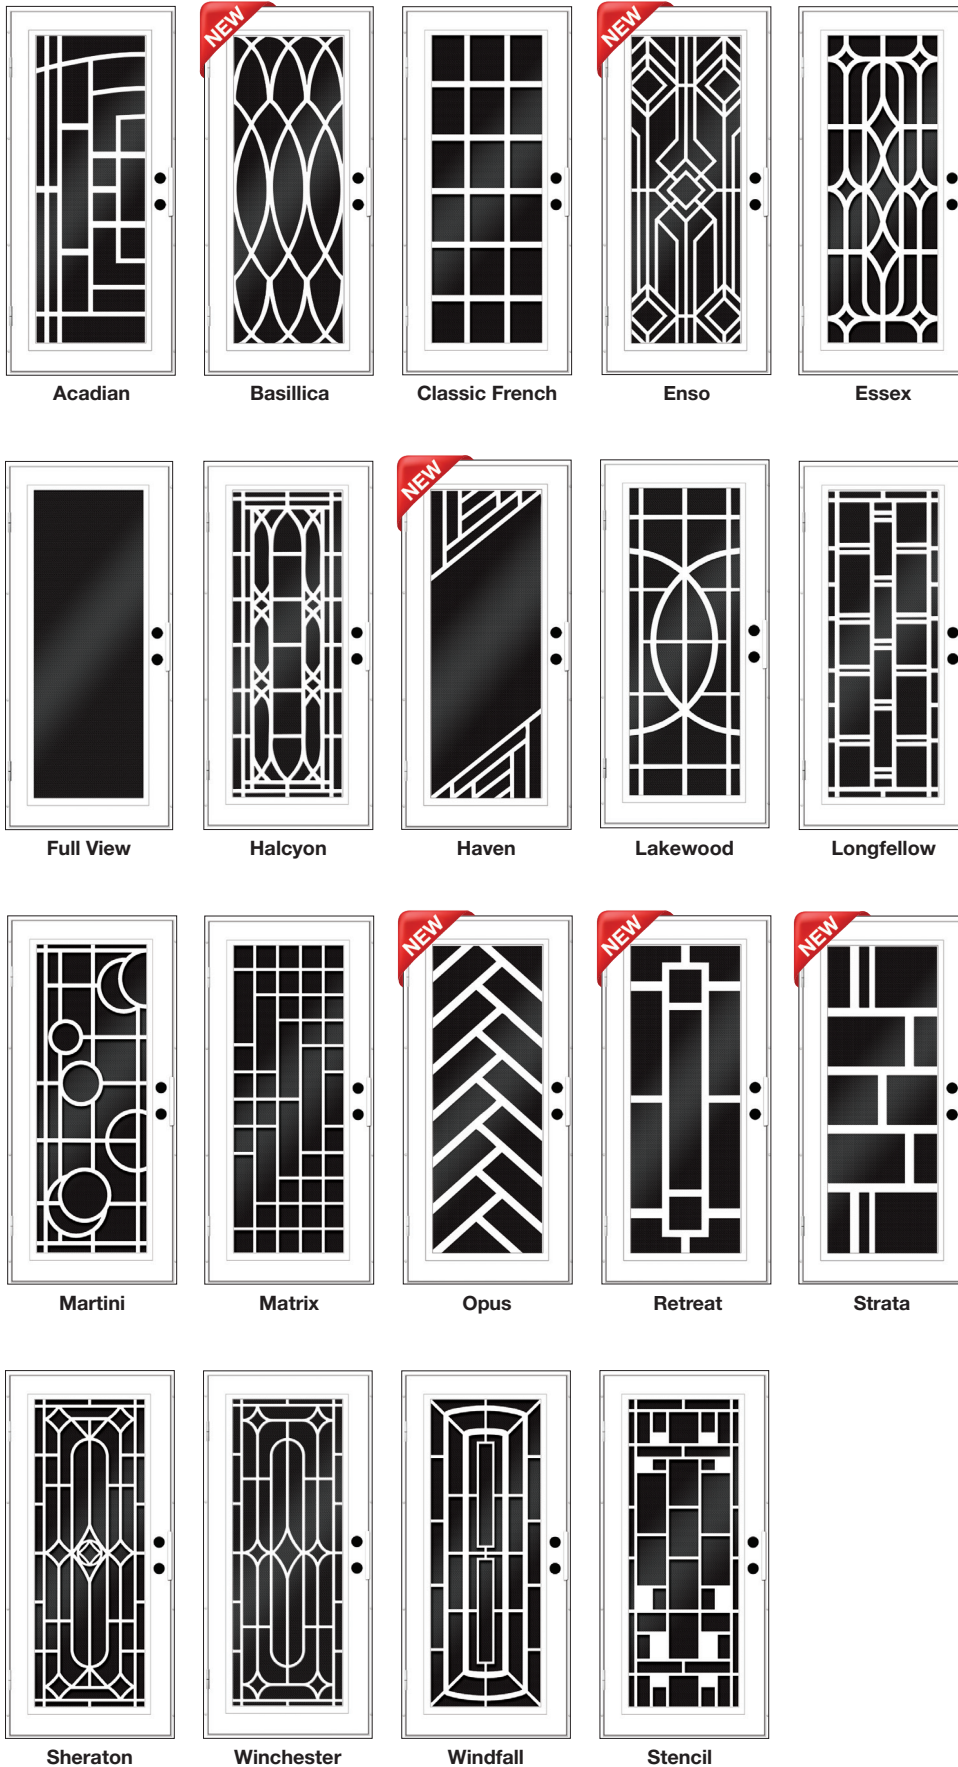

Double doors have a center post that is attached to the passive door, leaving no obstruction to the entryway when both doors are open. The active door (with handle) can be specified as left or right.

Some single door designs are mirrored in a double door as shown below.

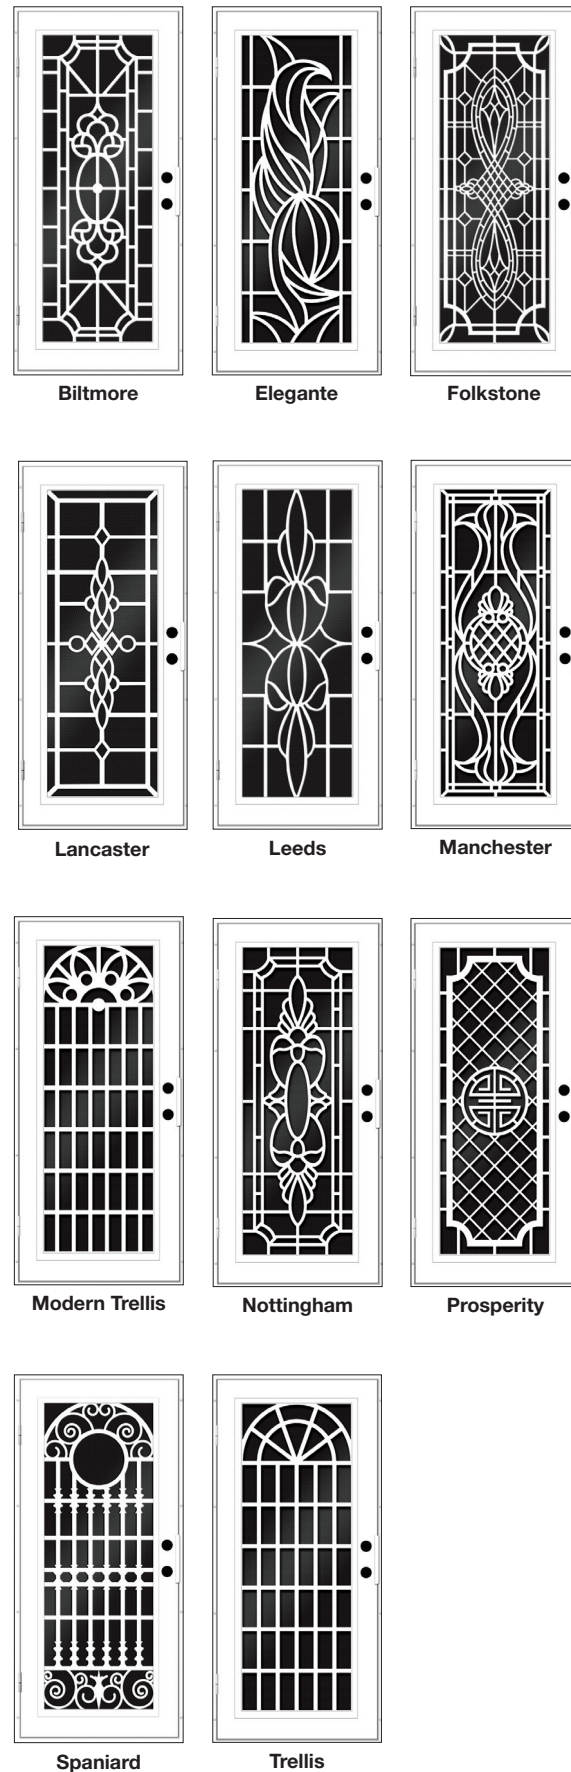

Mirrored models include: Acadian, Elegante, French Hummingbird, Harvard, Kokopelli, Martini, Matrix, Nogales, Playa, Sunfire, and Yale.

Stronger Screens.

Safer Homes.

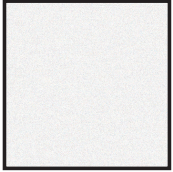

Our premium security screen doors are designed to do more than just look tough — they've been built and tested to meet or exceed the most advanced security screen specification in North America: AAMA 1901.

This isn't just security you can see — it's peace of mind you can feel.
